

## **TH Plantations Q4 earnings rise 17.8pct on stronger margins**

By **Business Times** February 26, 2026 @ 8:09pm

KUALA LUMPUR: TH Plantations Bhd's net profit for the fourth quarter ended Dec 31, 2025 rose 17.83 per cent to RM35.56 million from RM30.18 million a year earlier, supported by stronger operating margins on higher sales volumes and improved milling efficiency.

Quarterly revenue increased 2.78 per cent to RM302.53 million from RM294.35 million, driven by higher sales volumes of crude palm oil (CPO), palm kernel and fresh fruit bunches (FFB), despite softer average realised prices for CPO and FFB.

For the full financial year, net profit surged 43 per cent to RM107.5 million from RM75.18 million, while revenue rose 6.61 per cent to RM961.24 million from RM901.67 million, mainly attributable to higher average realised prices.

The company declared a final single-tier dividend of three sen per share, amounting to RM26.52 million, payable on April 30.

In a statement, TH Plantations said it expects its financial performance in 2026 to remain resilient amid global economic uncertainties, labour challenges and commodity price volatility.

"Palm oil prices are expected to remain firm in the near term, supported by steady demand and disciplined supply conditions. However, competition from other vegetable oils and broader macroeconomic developments may influence market dynamics.

"The group will continue to focus on yield enhancement, cost optimisation, sustainability and environmental, social and governance compliance, as well as prudent capital management to sustain earnings quality, strengthen operational resilience and enhance long-term shareholder value," it said.

TH Plantations, a subsidiary of Lembaga Tabung Haji, is principally engaged in oil palm cultivation, with more than 55,000 hectares planted across 38 estates and six mills in Peninsular Malaysia, Sabah, Sarawak and Kalimantan, Indonesia.
