TH Plantations Reports Higher Net Profit of RM35.56 Million in Fourth Quarter

PETALING JAYA, Feb 26 — Plantation company TH Plantations Berhad (THP) delivered improved financial results in the fourth quarter of 2025, posting a net profit of RM35.56 million compared with RM30.18 million in the same period the previous year.

The increase was mainly driven by stronger sales performance and improved palm oil prices, reflecting favourable market conditions during the period.

According to its Bursa Malaysia filing, THP's quarterly revenue rose to RM302.53 million, showing modest growth year-on-year.

The company's performance highlights its resilience despite ongoing industry challenges.

Full-Year Earnings Show Strong Growth

For the financial year ended Dec 31, 2025, THP recorded net profit of RM107.49 million, significantly higher than RM75.17 million in the previous year.

Annual revenue also increased to RM961.3 million from RM901.7 million.

The company attributed the improvement to higher realised prices for key products, including crude palm oil, palm kernel, and fresh fruit bunches.

Although sales volumes declined slightly, higher prices helped boost overall earnings.

Stable Outlook Despite Uncertain Market Conditions

Looking ahead to 2026, THP expects its financial performance to remain resilient despite global economic uncertainties.

The company said palm oil prices are likely to remain supportive due to steady demand and controlled supply levels.

However, external factors such as competition from other vegetable oils and global economic trends may influence future performance.

Commitment to Operational Efficiency and Sustainability

THP said it will continue focusing on improving productivity and managing costs effectively.

The company is also committed to strengthening its environmental, social, and governance practices.

These efforts are aimed at ensuring sustainable growth and enhancing shareholder value.

THP remains optimistic about its future prospects and ability to navigate industry challenges.
